

Recommended Diff Oil Weights for the Stock KM X2

This is just a Quick reference guide on what Silicone Diff Oil's to use when refilling or servicing the Diff's on the KM X2.

The Truck Uses 3 open diffs, one at the Front, Centre & Rear,

The way you set up the Truck can be a very personal thing, and is often done to how people like to drive, and how they like their trucks to feel on track

But as a STOCK set up you can go for a set up in the ranges of

30k-75k for the **FRONT**

100k-300k for the **CENTRE**

5k-15k for the **REAR**

These are purely suggested weights, and down to the Owner to choose the weights of oil they desire for their Trucks.
